

# ASP General Information

## ASP Compliance and Practices

**Alert Number: GI34\_18**

**Subject: Expression of interest to assist in Level 2 ASP service works associated with storm restoration activities December 2018**

**18 December 2018**

Currently Ausgrid is experiencing a high number of low voltage customer interruptions on the Sydney North areas of Pennant Hills and Galstone Gorge as a result of the recent storms.

Consequently, Ausgrid is seeking an expression of interest from Authorised Level 2 ASPs with Categories 3 (overhead service) and 4 (metering) qualifications to assist in the restoration of overhead services on the Ausgrid network in the affected areas who can be deployed today.

The work will be managed out of the Ausgrid's Hornsby Depot at 59 Bridge Road, Hornsby.

The attached information sheet outlines Ausgrid framework for Level 2 service works.

If you believe your Level 2 ASP company meets the criteria outlined in the information sheet, please complete the last page of the information sheet and return via email to [jbayley@ausgrid.com.au](mailto:jbayley@ausgrid.com.au) ASAP. Alternatively, forms can be completed at the Depot prior to commencing works.

Works are required from Tuesday 18 December and will be continually assessed from there on.

For further information please contact Ausgrid Project Officer Jacob Bayley (02) 4325 8582.
